

To Whom it may concern: I am a very happy paying customer of XM radio. I made a switch to satellite radio because I believe it offers more to the public than regular radio does. I am willing to pay for this service. I benefit greatly from the use of the local weather and especially traffic in my area. I do not believe the NAB has the right to tell me what I should or should not listen to. Please reject NAB's petition 04-160!

Sincerely,
Jay Yospa
